

L&H Dynamic Business Solutions LLC is Proud to Announce, The HVAC Smart Chip PLUS, a New Design with Dual Microprocessors Including Compressor Saving Technology

Sarasota, FL, December 04, 2014 --(PR.com)-- The principals at L & H Dynamic Business Solutions LLC, HVAC Business Consulting Company, announces the distribution of the latest product, The HVAC Smart Chip Plus. “The newest iteration of the product builds upon its current foundation of intelligently extending the fan blower to maximize HVAC system efficiency, which is proven to reduce Consumers electric bills by 15-20%,” says Howdy Hudson, a principal of LHDBS. He added “The timing of this aftermarket product is critical, especially since Utility companies continue to raise consumer rates.” He continues, “It's the only affordable solution on the market to combat current and future rate hikes without having to change out a complete HVAC system. It's simply quite amazing that a product that can fit in the palm of a hand can have such a major Consumer impact. The new HVAC Smart Chip PLUS controls the compressor, so it impacts air conditioning and compressor-driven heat system markets,” added Chris Leach, principal owner of LHDBS. Mr. Leach explained that “Manufactured equipment is engineered to achieve a certain temperature across the coil surface, which is typically achieved 25 minutes into a cycle. What happens is even though that temperature is achieved, meaning the coil can't get any hotter or colder, the compressor continues to run with no inherent benefit to the customer in doing so,” he said. “That's where The HVAC Smart Chip PLUS is going to turn off the compressor, allowing all of the energy that's been built up to that point in the cycle naturally into the home without the additional cost or usage of the compressor at the same time.” He adds, “I've said it before and I'll say it again - The HVAC Smart Chip PLUS is a true industry game changer.”

L&H Dynamic Business Solutions LLC is the exclusive Distributor of The HVAC Smart Chip PLUS in North America. LHDBS primarily distributes The HVAC Smart Chip PLUS through Independent HVAC Contractors, HVAC Contractor Associations, and National HVAC Brands. 2015 Expansion plans will include Commercial, Franchise Systems and Non-Profit Organizations.
